Re: Request for Change of Nature of Use of Permit No.'s 21-12857 & 21-7446

Dear Mr. Keen:

As part of the licensing of the referenced water right permits, we are requesting that the nature of use be changed on both permits from domestic to municipal. We are hopeful that Idaho Department of Water Resources can make this change in the licensing process. We see this as beneficial for two reasons.

First, a municipal water right better describes the nature of the use of water in our subdivision. Second, it gives us the flexibility to serve homes in our subdivision in the future that are currently served with private wells. We expect that someday private wells within the subdivision may fail for a number of reasons. In the event one having a failed private well approaches us, we want to be able to provide service without having to making changes to our water rights each time. We now have developed ample water under the referenced permits to serve all homes within our development.

Sincerely,

William B. Galbraith, President
