Re: Billingsley Creek Ranch Idaho

Dear Mr. Merritt:

Billingsley Creek Ranch Idaho, LLC desires to utilize waste water that is discharged from the hatchery owned by Kim Lemmon and Gary Lemmon. Big Springs Water Users Association is the source of water for water right No. 36-15681 which is utilized to operate the hatchery facility.

It is estimated that between 4.0 and 6.0 cfs of waste water is available from the end of the hatchery tail race for Billingsley Creek Ranch to utilize. The proposed permit would allow the use of the 6.0 cfs of water non-consumptively for fish propagation, wildlife and aesthetics. A 15 inch pipeline has been designed and installed to deliver the waste water to the Billingsley Creek Ranch facility, see attached NRCS design drawing. The water will be used to propagate fish and then flow into a series of ponds and discharge into Billingsley Creek.

It is the understanding of the applicant that the full 6.0 cfs of waste water will not be available through varies times of the year. Adjustments to water use practices will have to be adjusted based on the available flow.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., E.I.T.
