Thanks Ann, Mondays fine. You might also verify the well in the SWSW of Sec. ³¹~~34~~ (Lot 4) on right 36-2449. I'm wondering if it might be for the domestic use and if that well is really tied into the irrigation system or not?
Thanks, Jeanie

Another good question I'll ask Erick about... thanks Jeanie.

Subject: Transfer #76826 - R J, LLC

I'm working on entering this transfer and I have a question about the wells? The transfer application indicates making a PPU **only** out of all four rights but that the pods aren't changing so **that** part was not filled out. We usually don't see them this way so I just want to confirm that that is what you want to do. (Normally all the wells are listed on all the rights so that any right can be diverted from any well.) We can do it this way but that will mean each right can irrigate its acres anywhere within the PPU but it can only come from the well it is designated to now. Or will the wells be tied together? If they are, they appear to be in adjacent model cells so we wouldn't need to run the model. Anyway, if this is what you intend to do could you please explain why so I can put it in my memo for when the higher-ups ask? Thanks, Jeanie
