Re: Application for Transfer No. 70024

Dear Ms. Edl:

Attached is an Amended Application for Transfer No. 70024 showing the as-built ponds in RiversEnd Subdivision as requested in your letter of December 3, 2009. The total number of ponds is 17 including 2 small ponds, one of which is the splash pool for the waterfall near the entry to the subdivision.

Your December 3 letter also requested the estimated volume of the as-built ponds. Since the volume issue is not addressed in the transfer application, my request is to process Application for Permit 63-31515 filed on February 26, 2002. The pond volume will be determined at the time the permit is field examined and if there is more volume in the ponds than shown on the permit an additional Application for Permit can be filed. That is the applicant's preferred approach rather than amending the existing application and losing the priority established by the original filing.

Please let me know if you have questions or need any additional information to complete the processing of these 2 applications. Thank you in advance for your assistance.

Yours truly,

David B. Shaw
