I've successfully opened the pond shape file and I expect that the others will open and project as well.
Thank you very much.

These are the shape files reflected on the map attached to the application. The subdivision boundary is a cleaned up version of the export.

Mr. Shaw,

It was a pleasure to meet you last week. Thank you for taking the time to hand deliver and discuss the nuances of Transfer 70024 with Pam and I.

I would like to at least make the necessary shape file and data entry corrections for this transfer this week. Did you overcome the projection problem we experienced in our last attempt to share shape files?

I have some rough pond shapes that I will need to adjust to meet a surface area equal to 12 acres if the department software still can't successfully open your export files.

Please let me know one way or the other so I can budget my time appropriately.

Thank you

Michele Edl
