Re: Transfer Evaluation

This transfer proposes to change the place of use and point of diversion for the 5 rights involved. Since the point of diversion is being moved down stream the Water Master has assessed a 7% loss. The applicant has agreed and the total cfs reduced to 5.20 cfs.

Authority to File:

Subject land is owned by the applicant Brion Egan, evidenced by a Warranty Deed. Also the new place of use is owned by the applicant and is evidenced by Tax notice and Warranty Deed.

Water Right Validity:

Validity of the rights involved: All rights involved have been recently decreed in the SRBA with dates of partial decrees in the year 2000. Forfeiture does not appear to be an issue.

Injury to Other Water Rights:

Included with the application is the approval of the Water Master with a mitigation plan to reduce total cfs to compensate for moving the point of diversion downstream.

Enlargement of Use:

There is no evidence of enlargement of use.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issue identified.

Review of the application finds there is consistency with criteria set forth in Section 42-222 Idaho Code in processing of this application.

The application has been advertised and there have been no protests.
