REF: Confirmation on Power to the Well

I contacted Robert Bloomfield at (208) 726-5361 to obtain additional information on when power was installed by Idaho Power to the well. The business number stated that Mr. Bloomfield had not worked there for more than 10 years, and they had no other contact information (On the 10/4/2005 Affidavit in the file, Mr. Bloomfield was 81 years old at the time of the signing.)

I contacted Lonnie Linderman at (509) 991-4681 (Assignment of Permit from Bloomfield in 5/14/2001), and Lonnie had no additional information.

I contacted **Idaho Power at (800) 488-6151**, to obtain addition information on when power was hooked up to the well, due to 1/14/1992 Request for Extension of Time form stating that Robert Bloomfield (Permit Holder at the time), was unable to complete the remainder of the work due to being unable to obtain an easement for Idaho Power Co. to cross the adjacent property. I spoke with Valerie (Idaho Power's policy is not to give out last name's), and she stated that their records show service to 110 Logans Ln., Bellevue, ID. 83313 (physical address for POU), since 1994. **Valerie stated that they may have had service prior to 1994, but Idaho Power does not have any records on file any longer that go back further than 1994.**
