Subject: Environmental Quality Incentive Contract

Judd,

This letter is concerning your 2005 Environmental Quality Incentive Program (EQIP) contract. As you are aware this contract consists of irrigation system improvements to be installed on approximately 140 acres. These irrigation system improvements consist of a center pivot sprinkler system, buried pipeline and a structure for water control. Upon installation these practices will result in considerable water savings for the land served by this contract.

The following items need to be completed prior to installation of these irrigation practices:

1. The point of diversion needs to be approved by Idaho Department of Water Resources
2. The Bureau of Land Management will need to finalize NEPA documents and issue an easement/ right of way for the buried pipeline.
3. Final designs will be completed and approved based on NEPA document requirements prior to installation.

Please keep me updated on the progress of the above mentioned items.

If you have any questions or need additional information, please let me know.

Sincerely,

Mark Olson
District conservationist
