Permit Approved: 9/14/2005

Proof of Beneficial Use Received: 10/14/2005

Field Exam Conducted: 10/18/2005

POU Overlap Analysis: NO OVERLAPS

Conditioning

Comment	Water Permit Condition Report
Not used on licenses	08A This right is subject to the provisions of Sections 42-205 through 42-210, Idaho Code, restricting the sale, transfer, assignment, or mortgage of this right. Failure to comply with these provisions is cause for immediate cancellation of this right.
Change to X42	17M The Director retains jurisdiction of this right in order to limit the use of water for hydropower generation purposes to a specific term of years as required by Section 42-203B(7), Idaho Code.
Remains on license	025 This right does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required.
Change to R23	17K The water right acquired under this permit for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.
1 home confirmed	X01 Domestic use is for 1 home.
Remains on license—the right holder ponds water at the PD restricting the approach velocity	X16 The approach velocity at the point of diversion shall not exceed 0.5 feet per second.
System design was calculated by the field examiner. See section E of the FE. Condition will not be carried onto license.	01N The right holder shall install a measuring device that can be used to determine the instantaneous rate of flow of water through the system, or the right holder shall provide to the department a flow rate measurement or computation made by a certified water right examiner in accordance with actual system design and operation.
Remains on license—a screen has been installed	X15 A fish screen of 1/4 inch or smaller mesh shall be installed and maintained at the point of diversion.

PD Summary: No other rights are diverted from the PD under this right.

Volume and Diversion Rate: The rate will be licensed as recommended by the field examiner and limited to a total of 0.17 cfs, the system capacity. The volume will be limited to 123.1, the maximum given the rate of 0.17 cfs.

Amendment Needed? NO
