To: File 67-14442 Weiser School District 431

From: Sandy Hemenway

Date: 9/14/2010

9/14/2010, I called Jim Reed, Superintendent for Weiser School District 431 at (208) 414-0616, to obtain some additional information on the system, and to discuss the shapefile for the POU. Jim stated that the shapefile submitted with the original application for Permit included area up to the road, but that the Weiser School District 431 does not own the land up to the road lined with trees. The city owns that piece, and the trees are irrigated by seepage from a ditch that runs along the side of the road. Jim stated that the POU for 67-14442 is only the field inside the fenced area, since acreage to the south is covered under another water right (67-7023). I informed Jim that the shapefile I constructed for the irrigated POU totaled 9.0 acres, excluding land owned by the City of Weiser running alongside the road lined with trees, and not 9.4 acres (he agreed). Jim stated that there is no supplemental water from other sources that are available for this POU, only this groundwater source for irrigation. That Weiser School District 431 owns shares from Institute Canal, but they are for the property further south. The City of Weiser water is only used for drinking/potable water.

Additional information: Discharge size from the well is 3" reducing to 2" buried PVC then reducing to 1" buried PVC to each of the zones.
