MINIMUM REQUIREMENTS CHECKLIST

WATER RESOURCES TO BE SUBMITTED WITH APPLICATION FOR TRANSFER
WESTERN REGION

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at <http://www.idwr.idaho.gov/>.

Check whether each item below is **attached (Yes)** or **not applicable (N/A)** for the proposed transfer.

Yes N/A

* Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application. Part 2B forms are available on the Department's website at: http://www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/PDFs_09/WaterRight_TransferApp_Part2B.pdf.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-9.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the transfer applicant as the current water right owner.
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at http://www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/wrt_default.htm.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.)
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☒ ☐ #9 Other. Please describe: Letter from current land owner authorizing transfer application and pond construction.

Total number of acres to be irrigated n/a

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? Water rights owned by Gold Fork Irrigating Company (see Item 12 below).

- Who owns the property at the point of diversion? Peter Dinsdale
- Who owns the land to be irrigated or place of use? Peter Dinsdale
- If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: see attached letter from Mr. Dinsdale

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Two lined ponds in the Gold Fork River Ranch Subdivision are filled with water from the Gold Fork River, using the diversion works and canal of the Gold Fork Irrigating Company. The applicant intends to maintain these ponds as an aesthetic amenity for homeowners in the subdivision. The total surface area of the ponds is 8.4 acres and the average depth is 8 feet. Evaporative losses are estimated to be approximately 11 acre-feet annually (see Attachment A). Losses will be provided by non-use of Gold Fork Irrigating Company shares on 6 acres of previously irrigated land within the Gold Fork River Ranch Subdivision (see Attachment A), consistent with a transfer application filed by Gold Fork Irrigating Company (see copy as Attachment B). Because evaporative losses will be provided by Gold Fork Irrigating Company and thus no additional diversion will occur at the headworks of the Gold Fork Irrigating Company canal, it is suggested the permit be issued with the following condition: "Use of this right with right nos. 65-2256 and 65-10943 is limited to a total combined diversion rate of 0.12 cfs."

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½"x11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. (A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.)

BE IT KNOWN that the undersigned hereby makes this application for permit to appropriate the public waters of the State of Idaho as herein set forth.

PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future: The headworks, canal and diversion system will not change. Water for aesthetic use will be provided through the existing system.

- b. Who owns the property at the point(s) of diversion? No change in point of diversion.

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: _____

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☐ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: n/a

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer: Land directly under the amenity ponds will no longer be irrigated.

- e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use: n/a

- f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- | | | |
|-------------------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |
| ☐ | ☒ | currently leased to the Water Supply Bank, |
| ☒ | ☐ | currently used in a mitigation plan limiting the use of water under the right, or |
| ☐ | ☒ | currently enrolled in a Federal set-aside program limiting the use of water under the rights? |

If yes, describe: An additional application for permit has been submitted by Gold Fork River Ranch for groundwater use in 5 additional ponds. Mitigation for evaporative losses from these ponds will be provided by Gold Fork Irrigating Co. under these same water rights. We propose the permit applications, mitigation plan and this application for transfer be processed at the same time to avoid duplication of effort.

APPLICATION FOR TRANSFER OF WATER RIGHT PART 2

A. DESCRIPTION OF RIGHT(S) AS RECORDED

For each water right listed in Part 1B.1 of the application, attach a Part 2A report obtained from any Department office or from the Department's website @ <http://www.idwr.idaho.gov/>, Water Right Transfers, Step 1.

Insert Part 2A reports into the application following Part 1.

B. IF ONLY A PORTION OF THE RIGHT IS PROPOSED TO BE CHANGED, DESCRIBE THE PORTION BEING CHANGED AS IT APPEARS BEFORE THE REQUESTED CHANGES

- ☐ Complete and attach one copy of Part 2B for each right for which only a portion is proposed to be changed. If the entire right is proposed to be changed, Part 2B is not applicable. Additional copies of the Part 2B form can be obtained from any Department office or from the Department's website @ <http://www.idwr.idaho.gov/>, Water Right Transfers, Step 3, or Water Right Forms, Changes in Use. Insert completed Part 2B forms into the application following Part 2A of the same water right.

**APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3**

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☒ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

1. Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above.: n/a

IDAHO DEPARTMENT OF WATER RESOURCES
APPLICATION FOR TRANSFER OF WATER RIGHT
ATTACHMENT 8a

Application for transfer of water right 65-2256 includes a change in nature of use from irrigation to aesthetics. The following data and analysis is submitted to document the extent of historical beneficial use and provide evidence that the proposed change will not result in an enlargement of water right 65-2256.

Golf Fork Irrigating Company provides irrigation water for its shareholders. The most common farming practice in the area is the production of grass pasture. SPF examined on-line ET_{Idaho} precipitation deficit data from the Cascade 1 NW station to determine evaporative losses from shallow ponds at the proposed transfer location (copy of data attached). SPF then examined similar data to determine the historical consumption of water for grass pasture production (copy of data also attached). The two data sets were then compared to determine the number of acres that should be retired from irrigation in order to provide adequate water for evaporative losses from the ponds. A summary of the findings is shown below in Table 1.

Table 1: Summary of ET_{Idaho} precipitation deficit data

Prior to the proposed change, irrigation of grass pasture in the subject area is estimated to consume 1.81 acre-feet per acre due to evapotranspiration of the growing crop. Alternatively, the proposed ponds are estimated to consume 1.31 acre-feet per acre of pond surface due to evaporation (a total of 11 acre-feet annually). Using these estimates and neglecting inconsistencies contributed by numerical rounding, SPF determined that 6 acres should be retired from irrigation to provide for the evaporative losses from the ponds (providing the necessary 11 acre-feet annually).

RE: Application for Transfer of Water Right

To Whom It May Concern:

I am the owner of the land described as the SW $\frac{1}{4}$ of Section 25, T16N, R3E in Valley County, Idaho, referenced in the attached Application for Transfer of Water Right.

This letter is to serve as notice that I am aware of this application and do hereby give my consent to John Rennison of Rennison Fodrea, Inc., the primary point of contact, and SPF Water Engineering, the engineer who is coordinating this application, to facilitate this water rights transfer for the purpose of constructing ponds at the subject property.

Sincerely,

Peter Dinsdale
