Hey Aaron,

I received this e-mail earlier this month. It was the result of me asking how many permits still needed licensed so they could continue to move through the SRBA.

There is quit a history on 22-7114. It appears that since 2008 we have been jumping back and forth on whether or not we are going to void this permit (It is currently voided and disallowed in the SRBA). According to the e-mail below, as of Jan of 2010, the plan was to reinstate the permit. I see that the file is barcoded to you and you have some tracks in the backfile.

Basically, I am writing you because I want to make sure someone is on top of this and it doesn't slip through the cracks. If you are familiar with the situation and are following through with it, that is wonderful and I am not requesting the file ☺. However, if it is not on your radar and you have not been following this, then I just need to know so I can make sure we get it assigned to someone. The September hearing will be here before we know it.

Thanks Aaron,
Craig

Craig~

Following up on your 4/29 email about subcases awaiting licenses, I came across this one. Our status conf for this isn't until September.

ray, a prehearing was held. after the prehearing, ernie and rob were in agreement that the permit should be reinstated and that a license should be issued. after the license is issued, we will be able to prepare a recommendation consistent with the license. michael

Michael,

This is one that I didn't have on my radar to follow up with Ernie about. I know that Rob filed a Protest & Request for Hearing, but that is all that I could glean from the documents that I could find. Would you be able to take a look and tell me what the status is? It doesn't appear that there was a hearing concerning the voided permit. There's a status conference next week.

Thanks,

Ray

Ernie,

There was a hearing on status of permits on some Basin 22 rights today. In looking at the SRBA site, it looks like the permit was voided and an NCAP showing disallowed issued. During the hearing today, Rob said that this one isn't actually resolved and was being protested. There's a status conference set for this on 2/3 at 10:30. Could you let me know of anything that happens in the administrative area?

Thanks,

Ray
