Dear Mrs. Molyneux:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-27969. The proofs are to be made at 2:00 o'clock P.M., on the 21st day of November, 1961, ~~xxxx~~ before V.K. Jappesen, 113 So. Main, Hailey, Idaho, Notary Public.

As of this date we have mailed the Notice to the Hailey Times with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof and then mail the affidavit of publication and statement of costs to you.

It is important that the enclosed depositions be executed by you and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the place, on the date, and at the time and before the Notary, as advertised. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, the Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Very truly yours,

A. W. Molyneux
Gannett, Idaho

Dear Mr. Molyneux:

The executor of Mr. Molyneux's Estate should send a certified or photo copy of the Court Order naming the executor. The executor can then make necessary proofs required by the permit or, in the case of the estate being settled before the proofs are necessary, we would have a certified or photo copy of the Order of Distribution and the new owner can make the proofs.

The permit is still valid. The proofs of completion of works and beneficial use of the water is due on or before June 11, 1964. The executor can assign the permit in case the property is sold on approval of the court.

Dear Mr. Carter:

I am returning the application of Clyde Molyneux for a permit to drill a well along the banks of Silver Creek, dump the water into Silver Creek and divert into other ditches further up stream.

I have gone over the ground with Mr Molyneux and understand just what it is he is trying to do. Silver Creek is exceptional low for this time of the year and two of his natural flow rights have been cut off. Some of his lands could not be supplied from this well, due to elevation, but could be, and usually are, supplied through these two ditches, from his natural flow water.

Due to the cost of pumping he is not going to use this well any more than he has to. Incidentally, he has not even started to drill as yet.

Yours very truly

Watermaster

Dear Mans:

I am forwarding to you an Application for Permit to Appropriate Water from Silver Creek by Mr. Clyde Molyneux, with the thought that on account of your familiarity with Silver Creek, you may be able to understand what this man is trying to do.

We attempted to straighten out his application, particularly the land he proposes to irrigate, but probably made the wrong guess. If you, either un-aided, or with Molyneux's assistance, can make a comprehensive map showing the plan, it will be greatly appreciated.

Also, I would like to have your analysis of the propriety of the proving of an application of this kind, where the applicant proposes to pump water from a well into Silver Creek and divert it some distance upstream from point of diversion.

Enclosed is a letter which has been written to Mr. Molyneux but which I fear will not bring forth a definite answer if it were mailed. It is merely enclosed for your information.

With kind personal regards, I remain,

Very truly yours,

Dear Mr. Molyneux:

Enclosed is your application for permit with attached receipt for the filing fee and blank forms No. 0.

Nowhere do you show the direction in connection with the township and range. We assume it is Township 1 South and Range 20 E.

The land list on the second page shows all the land in Section 21. The map shows it differently. We have pencilled in on the land list and on the map the description which seems to fit your map. Correct as necessary.

The map should show the creek, points of diversion, and the ditches you will use to carry the Silver Creek water to your farm.
