Describe what work has been completed toward the development of this water right:
(This must be filled out! If no work has been completed, show "none".)

Design and construction of a diversion structure from the Milner-Gooding
Canal to the LSRARD (Shoshone) Recharge site (\$85,000) with capacity of 600 cfs.
Additional costs to construct bifurcation structure to divert Little Wood
River water to Milner-Gooding Canal.
Costing \$ 85,000.00

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Unable to put the full permitted diversion rate to beneficial use due to
drought conditions and lack of sufficient flows in the ^{Big &} Little Wood River System.
It is in the public interest to grant this extension of time as demonstrated by the
inclusion of aquifer recharge from the Wood Rivers system in the Eastern Snake
Plain Aquifer Comprehensive Aquifer Management Plan (ESPA-CAMP), which was approved
by the 2009 Legislature
Permit holder(s) request an extension to June 1, 20 14
