

MEMORANDUM

Date: July 29, 2010
To: Transfer 76571 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Application proposes changing the place of use of water right 37-22538. The proposed change is within the same 40 acre tract as currently described on the right (essentially just changing the WR shapefile). Since there is no hydrologic change, the transfer was processed, and can be approved, without advertising. The property involved with the application is located a couple of miles north of the center of Hailey, just south of Deer Creek Road on the east side of the Big Wood River. Note that right 37-22538 resulted from an "up front" split of right 37-8322. Also note that right 37-22538 resulted from a 50% split of 0.09 cfs and lists a diversion rate of 0.05 cfs (due to computer rounding) and will require a condition limiting the diversion rate to 0.045 cfs rather than the indicated 0.05 cfs amount.

- **Authority to File:**
The applicant is listed as a current owner, along with two other parties, of the right involved with the transfer according to IDWR records. Copies of a quitclaim deed from the applicant is included with the application showing that the applicant is now the sole owner of the right involved with this transfer.
- **Water Right Validity:**
The right involved with the transfer was decreed in the SRBA as a valid right in June of 2010.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
