RE: Applications For Water Transfer 66132 & 66133

Dear Trent;

I have just been informed by our Boise office that we still have not received written approval from your lender for these transfers. Before IDWR can grant approval, we need written statements from the lender on their letterhead and with a NOTARIZED signature from a bank official agreeing to these transfers. This information was requested a long time ago, but was never received.

I also noticed a discrepancy in addresses between the applications and the SRBA recommendations on these water rights. The above address is on the recommendations, but the transfers show 2040 Overland Ave. in Burley. The phone numbers differ also. We prefer to have a single address for each water user to avoid confusion, so please let me know which address and phone number you prefer. Unless I hear otherwise, I plan to change the application address to your rural address; or you should let Jeanie know that everything should go to your office in Burley.

Please respond by May 17 so that processing of your transfers can continue. Without this delay, I would hope to have the applications approved before then.

Regards,

James E. Stanton
Sr. Water Resource Agent
