Subject: Water Bank Rental Application
Lease Term Extensions (2)
Request for Release

Dear Aaron,

Enclosed on behalf of Dan Hukill is an application to rent ground water from the Idaho Water Supply Bank (IWSB) for industrial use. The ground water is needed for dust control purposes at the Deer Flat Road extension project site. Road construction is anticipated to start in early march and take 120 days.

Dan Hukill is proposing to rent his own water from the bank. In April of 2009, the attached IWSB lease applications were submitted to IDWR to be processed for the 2009 irrigation season upon approval of transfer No. 73810. IDWR approved the transfer 9/21/2009, however the IWSB applications were not processed. Dan Hukill is now requesting that the lease period for the unprocessed applications be extended indefinitely as indicated on the enclosed lease extension forms.

Please note that one of the rights proposed for change on the transfer No. 73810 was right 63-3599D, which was split as a result of transfer approval into children rights 63-33164 and 63-33165. IDWR's on-line water right records indicate that right 63-3599D was leased to the bank in 2001 and portions have been rented since 2005. The original lease application was not found in the on-line data available. One of the IWSB applications submitted in 2009 requested a portion of right 63-3599D to be leased to the bank. As a result of the approved transfer, the water to be leased is now a portion of child right 63-33164 rather than parent right 63-3599D. In an effort to keep IDWR records current and also assuming the 2001 lease application for water right 63-3599D listed an indefinite lease period, enclosed is a request for release of water right 63-3599D as submitted for lease to the IWSB in 2001. Please replace the record with water right 63-33164 as submitted for lease to the IWSB in 2009.

In summary, the ground water Dan Hukill is requesting to rent from the IWSB can be drawn from any of his ground water irrigation rights 63-7825A, 63-7825C, 63-33164 or 63-32076 as submitted for lease to the IWSB in 2009. Copies of the lease applications are enclosed.

Hi Lori,

I just want to confirm what I'm processing. It looks like there will be no active rental applications – I'll write a letter to this effect, essentially returning the rental application from earlier this year. However, it looks like we will be processing a lease application for 63-33164 (irrigation portion of 63-3599D) and 63-32076 (irrigation portion of 63-3599C). Once you confirm, I'll process. Thanks!

Monica

Monica,

This one is a confusing doozy. Hope the attached letter helps. With regards to water right 63-3599D, water bank action is requested for 63-33164 (irrigation portion), but not 63-33165 (industrial portion). Let me know if you have questions. Thanks Monica and congratulations again.
