

MEMORANDUM

Date: August 10, 2010
To: Water Right File 11-7452
From: cpadilla
Re: License Memo

There are no overlapping rights at the place of use of this right. The pond has a capacity of 1.5 af based on 0.3 surface acres x 5 ft average depth. The permit only authorized 0.3 af, so the right can only be issued for a pond for 0.3 af. Either way, the rate of 0.02 cfs provides only 0.04 af/day so the storage component is necessary for the right because it takes more than 24 hours to fill.

There are no special conditions that are of concern on this permit and will be licensed with standard domestic conditions. There is no diversion to storage so this right will be modified to include 2 PODS. One at the spring diversion and the other at the excavated pond. It should be noted that this right does not completely cover the pond.
