CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, the lease term expires, or upon request from the lessor to change the term of the lease.
5. While a water right is in the bank, forfeiture provisions are stayed.
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.

**WATER RIGHT NO. 63-7825A
WATER SUPPLY BANK LEASE ACCEPTANCE**

8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
9. In accordance with Idaho Code § 42-248 and 42-1409(6), all owners of water rights are required to notify the department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. Upon acceptance of a water right into the Board's water supply bank, the owner of the right may withdraw the right within thirty (30) days of acceptance into the bank if the owner does not agree with the conditions of acceptance.
11. When combined with all other rights, the leased rights shall provide not more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
12. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier 2/6/2009.
13. The following rights are diverted through points of diversion described above: 63-7825A, 63-7825C, 63-32706 and 63-33164.

The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

MEMORANDUM

TO: Water Right Files 63-7825A and 63-7825C
FROM: Monica Van Bussum
DATE: August 13, 2010
SUBJECT: Hukill Water Supply Bank Lease Application

SUMMARY

On April 13, 2009, the Department received an application to lease water rights 63-7825A and 63-7825C to the Water Supply Bank (WSB). The lease application sought to terminate the lease on November 15, 2009. On August 12, 2010, the Department received a Request for Lease Term Extension to make the lease indefinite for both 63-7825A and 63-7825C. Since the Department had not processed the previous application, there is no reason to deny the request to extend the lease term.

The applications seeks to place the following under lease to the WSB:

63-7825A – 0.40 cfs, 90 AF, 20 acres (in a 40-ac PPU with 63-7825C)

63-7825C – 0.40 cfs, 90 AF, 20 acres (in a 40-ac PPU with 63-7825A)

AUTHORITY TO FILE

The applicant is the current owner of the water rights.

STATE WATER PLAN

Acquisition of the right will be within the State Water Plan.

ABANDONMENT

There is no evidence the rights have been abandoned. Transfers were completed on September 21, 2009, and the transfer process validates the water rights.

LOCAL PUBLIC INTEREST

The lease is in the local public interest.

PROBABILITY OF RENTAL

Basin 63 is an active area for rentals from the WSB.

LEASE PERIOD

Per verbal communication from Shelley Keen and John Homan, the Department will no longer be accepting leases indefinitely, but for a maximum of five years.

RECOMMENDATION

Acceptance of the lease application is recommended with a lease period of 2010, 2011, 2012, 2013 and 2014.

APPLICATION FOR TRANSFER OF WATER RIGHT MINIMUM REQUIREMENTS CHECKLIST

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. The instructions, fee schedule and water right proof report or details report for Part 2A of the transfer application are available from any Department office or on the Department's website @ <http://www.idwr.idaho.gov/>.

Yes N/A Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

☒ Means this item is always required and should be included in application.

- ☒ ☒ Completed Application for Transfer of Water Right form, Part 1.
- ☒ ☒ Notarized signature of applicant(s) or applicant's authorized representative on first page of transfer application form. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ ☒ Application for Transfer Part 2A. Attach a Proof Report (obtained from Department) or Details Report (obtained on website) describing each water right in the transfer as currently recorded.
- ☒ ☐ Complete and attach an Application for Transfer Part 2B/C for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ ☒ Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ ☒ Correct fee submitted with transfer application form. (See last page of the application for transfer instructions.)

Attachments to Application Label each attachment with the corresponding number shown below as Attachment #1-9.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Department records do not show the transfer applicant as the current water right owner.
- ☐ ☒ # 2b If the ownership of the water right will change as a result of the proposed transfer, attach documentation showing land and/or water right ownership at the new place of use. Include documentation for all affected land and owner(s).
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at <http://www.idwr.idaho.gov/water/rights/>.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in water right(s) or land affected by the proposed transfer. (See Part 1.5.b.)
- ☒ ☒ #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and describe how enlargement will be avoided. (See Part 3B.)
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Other. Please describe: _____

2. Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred, (i.e. number of stock, etc.) and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it Part 1A.2.

PROPOSED AESTHETIC USE

Two ponds are proposed on 7.4 acres of irrigated land under water right 63-3599D. To mitigate the evaporative consumptive losses resulting from the ponds, 3.7 acres are proposed for change from irrigation to aesthetic use. The attached ET Idaho data indicates retirement of 3.7 irrigated acres adequately mitigates the consumptive water use resulting from the ponds. Averaging ET Idaho data from the Nampa and Deer Flat Dam AgriMet stations, annual deficit evaporation for open water-deep systems is 12.9 ac-ft for 7.4 acres of pond surface area. The consumptive use for 1.0 acre of alfalfa that has historically been grown on the subject property is 3.47 ac-ft (average from Nampa & Deer Flat Dam stations), resulting in 3.7 acres that need to be retired from irrigation to mitigate the annual evaporation resulting from the ponds. As proposed, 3.7 acres will be retired. Companion application for permit covers the storage component required for the ponds.

PROPOSED INDUSTRIAL USE

The industrial portion of right 63-3599D is proposed within 40 acres in the NESW & SESW, Section 15 only. Industrial use will cease in the SE, Section 15.

PROPOSED IRRIGATION USE

Currently, rights 63-3599D, 63-32076, 63-7825A and 63-7825C are appurtenant to a common permissible place of use and three-well diversion system per approved transfer No. 71840. Applicant proposes a separate 198-acre permissible place of use for rights 63-3599D and 63-32076 that will utilize two existing wells in the SE ¼, Section 15. Ground water from both wells will be diverted to the proposed ponds where it is re-diverted into a pressurized irrigation system for irrigation uses. See corresponding application for permit seeking aesthetic and fire protection storage. Irrigation storage is not sought by this application.

A separate 40-acre permissible place of use is proposed for rights 63-7825A and 63-7825C that will utilize all three wells as currently authorized.

Dan Hukill is the President of Crystal Lakes Development Company. He and Marcine Hukill continue to own a portion of the water rights proposed for transfer. An transfer authorization letter from Dan and Marcine Hukill is included as Attachment 3.

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Wells in SE ¼ : electric pumps to ponds, pumps from ponds to pressurized irrigation and dust control systems.

Well in SESW ¼ : electric pump to pressurized irrigation system.

Flow meters or power records.

- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☐ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes. Label it **Attachment #6**. List the name of the entity and type of lien:

No

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

7.4 acres of previously irrigated land authorized under water right 63-3499D will become ponds. The remaining irrigation water rights will continue to be used for irrigation within the described permissible place of use.

- d. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

None

- e. To your knowledge, has/is any portion of the water right(s) proposed to be changed

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe: _____

Conditions of Approval:

- Industrial use is for a gravel extraction facility.
- T08 Failure of the right holder to comply with the conditions of Transfer 71840 is cause for the Director to rescind approval of the transfer.
- 01Q After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

4. T17 Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the department from all authorized points of diversion which will allow determination of the total rate of diversion.
5. T07 The right holder shall accomplish the change authorized by Transfer 71840 within one year of the date of the approval.
6. X27 This right is limited to the irrigation of 103 acres within the place of use described above in a single irrigation season.
7. WB4 The total instantaneous diversion of water from all points of diversion under Rights 63-3599D, 63-7825A, 63-7825C and 63-32076 shall not exceed 3.35 cfs, nor a total combined annual volume of 778.5 af for the irrigation of 163 acres and industrial use.
8. I06 Use of water under this approval shall comply with applicable water quality standards of the Department of Environmental Quality.
9. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
The use of water for irrigation under this right may begin as early as March 1 provided other elements of the right are not exceeded. The use of water before March 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

This work and report were prepared by the University of Idaho Research and Extension Center at Kimberly, Idaho under contract with the Idaho Department of Water Resources. Work was supported by funding from IDWR and the Idaho Agricultural Experiment Station and Idaho Engineering Experiment Station. The authors gratefully acknowledge the long-term evapotranspiration data collection and long-standing advice provided by Dr. James L. Wright, USDA-ARS Kimberly (ret.), the more than two decades of high quality agricultural weather data collection by the U.S. Bureau of Reclamation AgriMet system, and the very long-standing, routine data collection by the hundreds of cooperative weather station volunteers across the state who, for more than one-hundred years, have faithfully observed daily air temperature and precipitation.

This work and report were prepared by the University of Idaho Research and Extension Center at Kimberly, Idaho under contract with the Idaho Department of Water Resources. Work was supported by funding from IDWR and the Idaho Agricultural Experiment Station and Idaho Engineering Experiment Station. The authors gratefully acknowledge the long-term evapotranspiration data collection and long-standing advice provided by Dr. James L. Wright, USDA-ARS Kimberly (ret.), the more than two decades of high quality agricultural weather data collection by the U.S. Bureau of Reclamation AgriMet system, and the very long-standing, routine data collection by the hundreds of cooperative weather station volunteers across the state who, for more than one-hundred years, have faithfully observed daily air temperature and precipitation.

Re: Crystal Lakes Development Application for Transfer

To Whom It May Concern:

We, Dan and Marcine Hukill, authorize Crystal Lakes Development Company to change water rights 63-3599D, 63-32076, 63-7825A, and 65-7825C that are currently appurtenant to property we own in the W ½, E ½, SW, Section 15. This authorization is made with the understanding that upon approval of the transfer, the industrial portion of right 63-3599D and all of rights 63-7825A and 63-7825C will be only appurtenant to our property and listed in our names. Rights 63-32076 and the irrigation and aesthetic portion of 63-3599D will be only appurtenant to property owned by Crystal Lakes Development Company and listed in their name.

Sincerely,

Daniel M. Hukill
