Re: Amended Water Right Permit Application 71-10923, and Amended
Water Right Transfer Application 75469

Dear Corey,

Enclosed is amended water right permit application 71-10923 which seeks to appropriate 4.0 cubic feet per second (cfs) of water for a non-consumptive aesthetic beneficial use from the Salmon River for use in a 0.5 acre flow through pond on Thomas and Elizabeth Tierney's property in T.07N R.14E Section 10 in Custer County, south of Obsidian, Idaho. Water is proposed to be diverted from the Salmon River by a low-impact diversion structure, through buried pipe, into a lined ditch and pond, and return to the Salmon River through buried pipe.

An amended additional information narrative with all pertinent information has been attached. Appendix C of the narrative has previously been provided to IDWR and agency comment letters intended to be included in Appendix D will be provided to IDWR upon receipt. Also attached is amended water right transfer application 75469 which converts 0.72 acres of licensed irrigated area to aesthetic use for the pond. 0.16 of those acres will need to be permanently dried up to account for additional open water surface evaporation from the pond that is to be constructed inside of ground currently irrigated. The Tierneys have agreed to "dry up" or cease irrigation on 0.16 acres of ground within water right 71-6971's licensed place of use.

We will solicit comment from IDEQ, IDFG and Custer County as soon as these applications are data entered by IDWR. It is our understanding that agencies are able to comment as soon as the amended applications are data entered by IDWR. We have also included a limited power of attorney (LPA) document. If you have any questions or comments, please don't hesitate to give me a call.
