Subject: Community Council of Idaho transfer application - request for information

Contacts: Terry Scanlan

Terry:

Community Council filed transfer application 76596 and application for permit 61-12258 for the housing/school facility in Hammett. Legal notices for both applications should be published in the last half of this month in an effort to move this along as requested in Jennifer's original cover letter. She noted you as the contact in her absence.

Additional Information for Transfer 76596

Rights 61-7701 and 61-7702 were licensed for a combined limit of 0.09 cfs in 1998. Please provide documentation showing the facility was operating at this combined rate of flow sometime in the past five years, 2005-present. This will confirm the validity of the rights being transferred.

Please provide your reply by September 30, 2010, to prevent the transfer from being rejected. A refund cannot be issued for a rejected transfer. As always, a request for more time in this regard can substitute for providing the information.

Thank you for your help with this. Please let me know if you have any questions or concerns.

Steve Lester
Water Rights Supervisor
IDWR Western Region

*Request into e validity of rights,
Response due 9/30/10*
