Subject: Dry Lot LLC Permit 37-22252

Aaron: Thanks for your continuing endeavors to get this permit completed. I have discussed the latest changes with the Dry Lot owners and they are in agreement with them but would like to consider one minor change in Condition 9. Specifically, we want to clarify that Condition 9 only requires Dry Lot LLC to be responsible for reporting their members' lots that also receive domestic water, not non-members. The Dry Lot LLC permit is for irrigation water only and we will report which lots also receive domestic water under other water rights.

If IDWR seeks to obtain the total number of homes served domestic water from the mutual wells from other water rights on an annual basis that would be a responsibility of the entity owning those other water rights and providing the service.

Please consider the following minor change in Condition 9 c):

State of Idaho

Department of Water Resources

Permit to Appropriate Water

NO. 37-22252.

8. The right holder shall maintain a totalizing measuring device of a type approved by the Department as a part of the diverting works.

9. By January 31 each year, the right holder shall report to the Department:

- a) The volume of water diverted from the authorized points of diversion for each month of the prior calendar year,
- b) The number and location (by subdivision lot number) of the acres of land irrigated in connection with this right during the prior calendar year, and
- c) The number and location (by subdivision lot number) of the homes referenced in (b) above also served domestic water from the authorized points of diversion pursuant to other water rights.
