Boise, ID 83720-0098

Subject: Supplemental Information for Permit 63-12461 Beneficial Use Field Examination

Dear Cherie:

As a supplement to the Beneficial Use Field Examination for permit 63-12461, enclosed please find a field map and irrigation logs for the 2008 and 2009 irrigation seasons.

Annual diversion volume for the 63-12461 place of use is summarized below and submitted in compliance with reporting requirement of the permit.

				Total Acres or Acre Feet
Field Number	251	404	415	
Acres within 63-12461 POU	79	13	137	229
2008 AF Applied Per Acre	1.68	2.25	1.65	
2008 Total Acre Feet	132.7	29.3	226.1	388.1
2009 AF Applied Per Acre	2.68	1.46	2.42	
2009 Total Acre Feet	211.7	19.0	331.5	562.2

Flow meter readings from the wells or pump power records are not suitable for determining diversion rate for the permit place of use because the place of use under this permit is only a small portion of the area served by the 12-well interconnected irrigation system. Therefore, the annual diversion volume for the permit place of use was calculated based on (1) weekly sprinkler run times for each field within the place of use, (2) the corresponding design flow rates for the field, and (3) the permit acres within the field. This calculation is the most accurate available for determination of annual irrigation volume within the place of use.

Cherie Padilla
