Blake,

The Idaho Dep't of Lands is the owner of water right 27-7452 that P4 Production LLC proposes to change. P4 entered into a mineral lease with IDL for the right to mine and dispose of all phosphate and associated minerals in, upon or under Section 36, Township 6 South, Range 43 East. Water right no. 27-7452 is not appurtenant to the land described in the mineral lease. I did not see anything in the transfer application that gives P4 the authorization to make any changes to water right no. 27-7452. IDL mineral lease no. 7958 does not provide such authorization. I think we need to ask the applicant for documentation that gives P4 the authority to change water right no. 27-7452.

Aaron

Blake,

I haven't been able to locate a review memo for transfer application no. 76399. Do you have a copy that you could forward to me?

Thanks,
Aaron

Blake,

This is one that was assigned to Aaron & he is on vacation until tomorrow.

He should be able to provide you with a status response then.

Pam
