If I look at the original maps submitted when the application for permit was submitted, and the Adjudication Recommendations, the 2 points of diversion in Sec 27 SWNE fall into the Mauldin Springs (springs source), tributary to the Cedar Creek. The diversion drawn on the map for Sec 27 SENW source shows up as Cedar Creek, if I compare the topo map with Arc Map.

So this is what I found for Point of Diversions. Please let me know if you agree or not:

- (1) New, SWNWSW Sec23 T14S R13E, source Cedar Creek (the point of diversion moved)
- (2) Old, SWSWNE Sec 27 T14S R13E, source Springs, Tributary to Cedar Creek
- (3) Old, SWSWNE Sec 27 T14S R13E, source Springs, Tributary to Cedar Creek
- (4) Old, SESENW Sec 27 T14S R13E, source Cedar Creek

Your call,

The diversion we are moving was from Cedar Creek which is fed by the Springs. I believe the more accurate description of this particular diversion is Cedar Creek since the springs are tributary to Cedar Creek upstream of this diversion and the old diversion that is being replaced.

What about the sources: you have Cedar Ck., and the Adjudication Recommendations have for the "old sources" Springs?

Sandy,

Good catch. The correct description should be the SWNWSW. Thank you for checking. Please let me know if you need anything more to correct this description.

Here's the pages I was referencing, and maps.

Hi Vic,

I am working on Transfer 76469/47-29. On the map submitted with the Application for Transfer, the New Point of Diversion is plotted with a "red dot" in the SWNWSW, but the description in the narrative block on the map, and also on Page 2 of the application are shown as "NWSWSW." Could you please send me an email confirming which legal description is correct?

Also, on page 2, under #3, for the "Old" point of diversions, the sources are described as "Cedar Creek," yet on the Adjudication Recommendation the sources are described as "springs." Could you please confirm which is correct?

Thanks so much,

Sandy Hemenway
