Subject: Amended transfer 70645

Jarin:

Attached is an amended application for transfer 70645 and a map. There are few items on the transfer that need discussed and supporting documents needed for the application.

- 1: It appears the owner of the Property is Mount Oxford Ranch Company. If this is correct then we need to do an ownership change within the transfer. Please look at the applicant name and contact info on the transfer. If it needs changed please do so. I need a contact phone number for the applicant. I will need a recorded warranty deed showing Mount Oxford Ranch or Whomever as the current owner of property.
- 2: I believe this transfer will be adding a point of diversion. I am under the impression that the existing pump by the large pond will be the diversion point to the field. If that is the case we will be adding a point of diversion. Please look at the map to see if I got the additional point of diversion in the right location. If it is incorrect mark where the point of diversion is located and send it back. I will create a new map showing that change.
- 3: There is an unanswered question on page 4. Please have the applicant answer Yes or No. If yes we will need a letter from the lien, deed of trust or mortgage holder approving changes. If you want to change any wording to the answers for the questions please do so.
- 4: The CRP contract you provided isn't a complete contract. We need the other part of the contract or a FSA map identifying the field and acres in CRP.

The final thing that we will need to begin the transfer process is the recorded land easement agreement with a \$50 filing fee.
