Re: Place of Use – Data Entry & Shapefile correction.

An error was found in the place of use data entry and shapefiles for Mud Lake Water Users Inc's groundwater irrigation rights (31-328, 31-329, 31-330, 31-331, 31-332, 31-336B, 31-337B, 31-371, 31-2239, 31-2265, 31-2289, 31-2290, 31-2297, 31-2310, 31-2317A, 31-2317B, 31-2321, 31-2341, 31-2342, 31-2343, 31-2344, 31-2345, 31-7005, 31-11430, 31-11432) and one of Mud Lake's surface irrigation rights (31-354). There was no place of use data in workflow or in ArcMap for the irrigation from storage component of the rights. It appears when the groundwater rights were pulled into Transfer 72559 (approved January 2007) the data entry and shapefile work was done only on right 31-327. With regards to 31-354 (which was not in 72559), the reason for the missing data entry and shapefile is unknown. See 31-327 file for an email string regarding how the error was noticed.

The data entry and shapefiles have been corrected to match the SRBA partial decrees previously issued (Transfer 72559 did not alter the place of use for the groundwater rights).
