Subject: RE: Application for Permit for Sawtooth Fish Hatchery

Corey, we won't oppose the granting of the right.

But my AG requires a letter after their review, so the official response may take a week or so. However, I'll get it started ASAP tomorrow. Thanks

Subject: Application for Permit for Sawtooth Fish Hatchery

Gentlemen,

Attached is a copy of an application for permit related to the appropriation of additional groundwater for fish propagation use at the Sawtooth Fish Hatchery near Stanley. We will need IDF&G and IDEQ comments on this one. I assume you will have no issues on this, but wanted to make sure. Apparently everyone is in a big hurry to get this one rolling so that well construction can begin before the weather turns bad. It is a requirement that the first advertising of these types of applications occurs either the first or third week of the month. We will have a publishing deadline this week, in order to get the application advertised the first week of August. We need to have your agency comments in before advertising.

Could you shoot me a quick e-mail so I have something for the file indicating that your agency has no issues with this application? If you have any questions, feel free to contact me at 736-3033.

Thanks,

Corey
