

MEMORANDUM

TO: File
FROM: Monica Van Bussum
DATE: July 23, 2010
RE: Licensing 63-12378

This memo reflects some of the decisions for recommending licensing for 63-12378.

Applicant: As permitted; no changes.

Source/POD: Source and POD PLS as permitted. There are other City of Meridian wells, but this water right does not share PODs with other rights and no combined use limits needed.

Nature of Use/Season/Rate: Nature of use and season as permitted; no changes. Permitted rate reflects development, so recommend licensing rate as permitted.

POU: City of Meridian service area.

Conditions: Removed permitting conditions 7, 8 and 11, which are no longer required.

At the time the permit was issued, the department was concerned about the location and depth of wells in this area. The permit condition which defines the water bearing zone addresses those concerns. The well screening shows compliance with permit conditions. Additional information has become available to the department which eliminates the need to retain the water bearing zone condition. This POD is currently considered to be located outside the area of concern so that condition was not carried forward to the license.
