Subject: Meyers update

Allen:

To recap our earlier telephone conversation, I understand that the department would accept that Meyers holds 110 acres of primary supply under 36-10301 per the map that I submitted earlier, and that the remainder of the right could be transferred from the Andrus parcel(s) as a supplemental water right. Mr. Meyers could transfer the supplemental portion to the current place of use and secure and use sufficient surface water to cover his use. As an alternative, Mr. Meyers could also acquire other primary ground water rights and transfer to this place of use. We are working diligently towards a permanent solution to this issue. In the meantime, we are investigating opportunities for utilizing the water bank to secure water for the 2010 irrigation season, either with some of Mr. Meyers other ground water rights and/or with other ground water rights that may be available for rent. I hope that I have summarized our conversation correctly. Please let me know if otherwise. We will get back to you shortly.

Thank you,
Scott
