RE: Water Right Permit No. 22-07697

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 x Point of Diversion

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form within 14 days. The amendment fee of \$50 under receipt number C091027 will be transferred to the new amendment.

This letter also serves as an acknowledgement of change in ownership. Northwest Farm Credit Services assigned their portion of rights 22-7697 and 22-13973 back to you. As a result, I re-joined the rights under 22-7697.

On June 8, 2010 that Department received an Application for Amendment from you that did not accurately describe right 22-7697 because the split in ownership erroneously created two water rights instead of one. The department will retain a copy of that amendment for reference purposes and return the original form to you.

If you have any questions, please call me at (208) 287-4944.
