Subject: *Statement of Completion and Field Exam for Lapsed Permit 63-31957*

Dear Emalee,

The following letter and enclosures serve as a petition to the Department for reinstatement of lapsed permit 63-31957.

The original proof due date for permit 63-31957 was May 1, 2007. The proof due notice was sent February 28, 2007 to the address listed on the permit. The notice was returned to the Department undelivered. A lapse notice was then sent May 7, 2007 to the same address and was again returned to the Department undelivered.

Annual reports filed by JLJ Enterprises, Inc. (permit holder) are available on the Secretary of State business entity web site starting in 2004. The report forms indicate that JLJ's address changed in 2005, and again in 2006, which explains why the notices were not delivered. As a result, JLJ was unaware of the proof filing deadline and the lapsing of permit 63-31957.

The permit's status was discovered by the City of Meridian. The City has purchased the system from JLJ and wishes to reinstate the lapsed permit. The permit was active May 26, 2005 to May 1, 2007. Attached is evidence of beneficial use within the permit's active timeframe including a 2007 aerial photo of the subdivision and a copy of the 3/12/2007 as-built certification letter to IDEQ.

A beneficial use field report with the statement of completion for submitting proof of beneficial use are also enclosed for licensing permit 63-31957 upon reinstatement.

May 28, 2010

Please let me know if there are any questions. Thanks Emalee.

Sincerely,

Subject: Bittercreek Meadows Water System As-built Certification

Dear Mr. Crutcher:

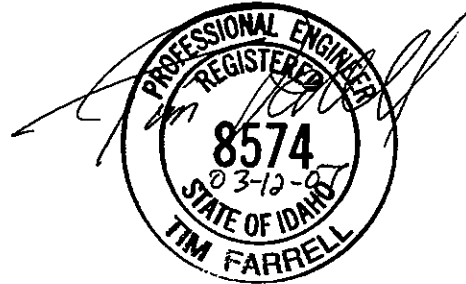

On behalf of JLL Enterprises, SPF Water Engineering is pleased to provide the enclosed as-built drawing and bacteria sampling results required for final approval of the Bittercreek Meadows public water system.

This letter is certification the water facilities are constructed in accordance with the plans and specifications previously submitted and approved by IDEQ for the Bittercreek Meadows water system.

Please contact me with any questions.

Sincerely,

Tim Farrell, P.E.
Project Engineer
