Re: Permit #63-11645

Dear Sharla,

A few months ago I called you and you helped me immensely with the enclosed papers.

When I finally got back to filling the papers out, I seemed to have forgotten everything you told me.

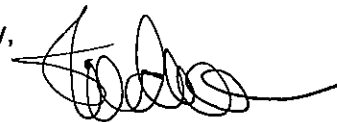

Please forgive this. We have two wells. One, for irrigation, has a 10 horse pressure pump. We sprinkler irrigate the 4 (+-) acres on the front and the 1 (+-) acres in front of the house. We cannot afford the power required to irrigate more.

Occasionally we have a couple of calves. Someone bought them for us last year. We have none this year but may next year.

The second well has a $\frac{3}{4}$ horse pressure pump and supplies water for whatever domestic purposes we require. We do have a better water processor on this in the house that removes the sulfates, arsenic and iron. I think there should be something that says if one's wells are as toxic as ours, they shouldn't have to be licensed. Our water is good fertilizer and my orchids do well, as do the roses.....all that sulfur and iron should be good for something!

Thank-you.

Sincerely,

Sharon

Enclosed: Check for \$50

Jeff Peppersack, Chief
Water Allocation Bureau
State of Idaho
Department of Water Resources

RE: Permit NO: 63-11645

Dear Mr. Peppersack:

In May I called your department and was directed to Sharla. I told her that I had the papers but couldn't find the cover letter. She sent me the second well drillers log.

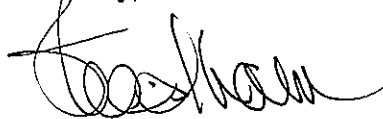

I had an accident in the past and last year, another. Bones didn't heal properly and needed a couple operations to correct. It was difficult to sit, stand, walk. That sort of thing. I did work on the papers and then put them away. Without the letter I really didn't know what the due date was.

Last week I called; talked to a lovely lady and then realized that these were due July 1. I am in a hard cast and need my left leg elevated all the time. Walking with pins is excruciating. My foot swells up larger than the cast. I'm not able to use crutches or a scooter. Some pins will be removed, hopefully, Wednesday. Three toes were broken in the past but all have pins in them. Some pins in other places will stay. These papers could not have come at a worse time for me. I also have a teenager. (Try to figure 8-10 weeks of food for a 14 year old boy that is, well, 14). (He also comes with friends - they don't get why they can't do the locust thing- if they're hungry, they eat.) I do have great friends that shop for me and -Dominos delivers out here. The first time I got to the kitchen, 2 weeks out, it looked like a war zone.

As soon as I found out that this was due the first of July, I filled everything out. My husband mailed the envelope addressed to 1301 North Orchard-didn't have the cover letter so I didn't know your address had changed!!!. It was returned Saturday. The day your letter came.

We will re-mail the papers in another envelope, Sunday (today). Please reconsider your edict.

Sincerely,

Sharon Needham
