

Petition for Reconsideration, Permit #37-21384

RECEIVED

JUN 15 2010

DEPARTMENT OF
WATER RESOURCES

We petition the Idaho Department of Water Resources to reconsider the preliminary order issued by the department pursuant to section 67-5243, Idaho Code sent to us in a letter dated June 4, 2010 but mailed on June 7, 2010, signed by Shelley W. Keen.

We have been trying to solve this problem for quite some time but have received conflicting information from both your Twin Falls office and from the Northside Pumpers in Jerome, Idaho. Following are the facts of the case.

- This well was put in for three homes on the advice of your offices in Twin Falls.
- Lawrence visited the Twin Falls office twice during the month of April, 2010 asking how to solve the problem.
- The second time he visited trying to find an answer to help solve the problem, he was told to just go away. This might have been said with tongue in cheek, but he took it verbally. The office in Twin Falls appears to have an overwhelming work load for the number of staff.
- Lawrence visited the offices of the Northside Pumpers in Jerome—also in April, 2010 and was told that this permit for three homes was too small for them to worry about and to just forget it.
- It is not impossible to bring irrigation waters to these homes, but it is impractical because of their geographical location.

We are very willing to pay the amount and join the Northside Pumpers. We just need to be allowed to do this.

We therefore petition the Idaho Department of Water Resources to reconsider this preliminary order. In the event that they cannot completely reinstate the water right, we ask for a reconsideration for houses only. If this is not reconsidered, our only other choice is to put in multiple wells.
