RE: Application for Permit 75-14607

Dear Joe and Sandie:

I have enclosed an Order Modifying Lockable Device Requirement for Permit 75-14607. The order slightly alters Condition 10 to allow for an alternative means of locking the diversion works. We will need return correspondence, including a picture or pictures and a narrative explaining the alternative locking works, to determine if you have met the requirements of the new condition.

This information should be submitted to IDWR within 30 days of your receipt of this letter. Once your correspondence is received, we will move forward with licensing. If your response is not received within 30 days, IDWR will only be able to license the *de minimis* part of the development, or no more than 0.5 acres of irrigation.

Sincerely,

Shelley Keen

Manager, Water Rights Section
