RE: PERMIT NO. 77-14234

Dear John:

As requested in Paragraph 3 of your March 4, 2010 letter, we have commenced construction of the diversion, irrigation and water storage system. Please see pictures attached.

We are currently watering our yard and several acres of pasture. We have planted over 100 pine and spruce trees that are also being watered from this source.

The water is collected in a 750 gallon tank with overflow into a storage (stock watering) pond. The pipe line from the storage tank to the storage pond ALSO SERVES AS A FIRE PROTECTION SYSTEM. WE CAN PUMP WATER BACK UP THE HILL FROM THE STORAGE POND TO A "FIRE HYDRANT" BESIDE THE GARAGE. THIS PUMPING SYSTEM IS CAPABLE OF REACHING (PLACING FIRE PREVENTION WATER ON) THE ENTIRE HOUSE AND GARAGE. (See pictures of high pressure pump).

We appreciate your assistance in this matter. If you have further questions about the system we are installing please let me know.

Sincerely,

Steve & Patti Knowlton
