Michele,

Yes, these shapes look fine. Thank you for keeping this application moving.

Best Regards,
Doug Glaspey

Subject: place of use shape

Mr. Glaspey,

I have attached a projection, against 2009 aerial photography, of the place-of-use shapes that I created for US Geothermal transfer 76465. I found that I could not exactly reproduce the shapes that you provided with your application and at the same time, keep the acreage that you listed for use in each quarter-quarter. The Department's Arc Map quarter-quarter lines didn't divide the property the same as your Google map did.

Please let me know if these shapes are an acceptable approximation.

Thank you
Michele Edl
