Suppression/Irrigation Well for
pump and dump system

Thank you for the heads up, Jeff. If Marvin has not yet advised Benny Walker of this final decision, he will need to make that contact in order that Benny can make sure the water right application is in correct format for processing. Once we have a final application we will also coordinate with the UIC staff processing the injection permit and make sure they are aware.

Subject: Carey Schools Fire Suppression/Irrigation Well for
pump and dump system

Hello, Cindy –
I met with Blaine County School District reps this morning, along with the McKinstry design team. They decided they do not want to pursue using the existing fire/irrigation well at the Carey Schools location for the proposed “pump and dump” heat exchange system. Therefore, I will not be pursuing the backflow prevention inventory and design for the irrigation system.

Thanks for you help, and talk to you again, soon!
