Subject: Carey Schools Fire Suppression/Irrigation Well for pump and dump system

Hi, Cindy –

I need to coordinate with you as Water Master for Carey regarding using the existing fire suppression/irrigation well for the proposed “pump and dump” heat exchange system at the Carey school campus. Marvin Sauer (McKinstry) and I had discussions with Cory Skinner and Benny Walker on this idea, last Friday.

I believe Marvin has already revised the permit application to reflect this existing well as a potential point of diversion (along with up to three other new wells), but I would like to discuss specifics about what would actually have to be done at the existing well. That is, new line, metering, etc.

I am out of the office this afternoon, and have a meeting in the morning tomorrow (Tuesday), but we can try to talk tomorrow afternoon, or e-mail correspondence is fine by me.

Thank you,

JEFF LOOMIS, PE
