REQUEST FOR EXTENSION OF TIME to provide additional time in which to submit proof of beneficial use for a water right permit.

Teton County applied for a water right for use on the Teton County Transfer Station site. Along with this permit the county arranged to receive fire protection from a neighboring subdivision. The county still has not received adequate water to provide fire protection from the neighboring subdivision. The county has not started drilling the well for the water right which would provide culinary water for the transfer station in case water cannot be obtained from the neighboring subdivision and the well designed for culinary purposes needs to be enlarged to also provide water for fire protection.
