RE: Transfer No. 70444

Mr. Huyser:

In November 2005 you were assigned ownership of the above application for transfer, originally filed in the name of Hubsmith. At the time, the transfer was on hold pending the outcome of a licensing amendment for the one or more of the affected water rights. You asked us to continue to hold the transfer until the determination was final.

On December 1, 2006, IDWR signed an order which corrected and amended right nos. 37-7268, 37-7454, 37-7602 and 37-8679. The application for transfer has remained in our office since that time, but has remained on hold. It appears that processing may resume based on the corrected rights, and I apologize that you were not contacted earlier.

The net result of the 2006 Order was to shift acres to senior rights, and increase the total authorized acres by 12, to 489 total acres. The application for transfer was based on the previous total acreage of 477. Therefore, an amendment is necessary in order that we can include all the acres under the modified rights. We will also require a confirmation of the location of all irrigated acres.

Please contact me at your earliest convenience. If you are still interested in advancing this transfer, I will help arrange an appointment for you with one of our staff, to make the necessary changes in the application.

Regards,

Cindy Yenter
Water Rights Supervisor
