Subject: Wickel spring project...

Les,

We received Bill's joint application and determined his decreed right 43-77 did not cover stock water uses and so he needs a water right in order to proceed. I sent the following letter to him today. Jeanie

RE: Joint Application for Permits

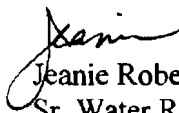

Dear Mr. Wickel,

I received a copy of your Joint Application for Permit for review. This is in regards to the pending Spring Development Project you are currently working on with Les Young of the NRCS in Burley. A copy of a proof report for Right 43-77 was attached. That right was decreed for irrigation purposes only and does not cover stock water uses. You must obtain a water right to continue this project. I have enclosed an Application for Permit and Instructions. Please complete the application form and return it to our office along with the filing fees in order to start the process of obtaining your water right. If you have access to a computer, you use can use the following links to our website and fill it out online, then print and return to us with the fee.
