Re: Beneficial Use Field Reports / 37-8502 & 37-20400

Dear Shelley:

Enclosed are two field reports and narrative descriptions for the above-referenced permits. These rights are held by Bruce Willis and are appurtenant to three lots within Flying Heart Ranch subdivision north of Hailey. Proof has been filed on both permits, but one of them (37-8502) has been outstanding since 1989. You indicated by e-mail on 9/3/08 that it would be acceptable for Brockway Engineering to conduct the field examination for these permits.

Please note that the examination for permit 37-8822 could not be performed since the water was not being diverted at the time of the exam. This permit allows 0.1 cfs of water to be diverted by gravity from the upper Flying Heart pond, through a ditch and small pond, and back to the channel below the pond. At the time of the exam, the spring-fed Flying Heart pond was not high enough to cause gravity flow to occur, although it clearly had flowed recently. During high water next spring an examination is planned for this permit.

I would be happy to answer any questions that may arise or collect any additional data that may be required.

Cordially,

Charles G. Brockway, P.E.
