SALMON, ID 83467

PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 74-15733

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. During my review of your proof and water right permit, I found two conditions of this permit that may not have been complied with.

Condition no. 5 of this permit which states:

"Prior to diversion of water under this right, the right holder shall install and maintain a measuring device and lockable controlling works of a type acceptable to the Department as part of the diverting works."

Condition no. 6 of this permit which states:

"As part of the diversion works, the right holder shall install a straight length of conduit that will accommodate a device for measuring the entire flow of water being diverted in connection with this right. The straight length of conduit shall be at least ten times the diameter of the conduit and shall be above ground or otherwise easily accessible."

I recommend that these conditions be complied with immediately and prior to the field examination. Enclosed is a copy of this permit for your information. If you feel the lockable device requirement is unnecessary, you must contact the watermaster about his need for this requirement. If he agrees that the lockable device requirement is unnecessary, request that he/she provide the Department with written agreement that the requirement can be waived at this time. Upon receipt of your request and his acknowledgement the Department will issue an order waiving the requirement at this time.

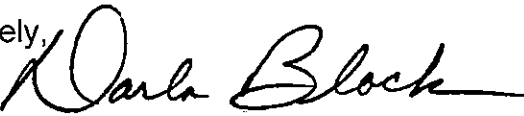

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. Therefore, you may wish to install the straight length conduit to accommodate a device for measuring the entire flow of water being diverted, before the department conducts the field examination to avoid any problems in licensing your permit.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office, or at the department's website at:

www.idwr.idaho.gov

If you have any questions regarding the permit conditions, please call me at (208)287-4945. If you have any questions concerning the field examination, please contact the Eastern Regional Office of the department in Idaho Falls at (208) 525-7161

Sincerely,

A handwritten signature in black ink, reading "Darla Block". The signature is fluid and cursive, with a large initial "D" and a long, sweeping underline.
