RE: Proposed change of Water Right
Application Transfer #75704

Dear Director:

I, Tony Richards, protest Application #75704 submitted by Junayo Ranch Ltd. Partnership. The following is a list of my protests and concerns:

- 1) Increase of irrigated acres demands an increase in flow, therefore, injury can be claimed.
- 2) There has been no data provided of ditch flows or of irrigation from storage to show injury has not occurred.
- 3) According to stipulations on Water Right 57-7400 there is no room or supply for the addition of twenty (20) acres.
- 4) To the best of my knowledge, Idaho Code, does not define "error" which is the basis of the transfer application. I would like you, as the Director, to define "error" and how it would be applicable to this filing.
- 5) Due to the year-to-year carryover of stored water the request for additional storage is not justified.
- 6) By proof of this filing Application #75704, water can obviously be siphoned off the storage and/or irrigation system with no consequences or knowledge to anyone else. There must be assurances that this will not continue.

Respectfully submitted,

Signed

Tony Richards
