Re: Hydro Electric Development on Mud Creek

Dear Mr. Skeem:

We have reviewed the proposed hydro electric development on Mud Creek that will be run in conjunction with the effluent from your fish hatchery. The effluent from the fish hatchery must be treated to meet Federal Guidelines for fish hatchery effluent and the subsequent use of this water to generate power will have no effect on water quality or will be of little environmental concern.

If we can be of any further assistance, please call us.

Sincerely,

A handwritten signature in dark ink, appearing to read "ASchaefer", is written over a horizontal line.

Alex Schaefer
