Dear Craig:

As per our conversation this morning, we would like to go ahead and ask for a re-measurement of the water output for the two wells that we own and that comprise the water right 11-7151.

As we discussed, there have been no changes to the system since it was originally established, with the exception of deepening one of the wells and usual maintenance such as bowl and shaft changes. Given that you can support at least the 3.84 cfs as an historically accurate figure, we would like to see what the wells produce without broken shafts or worn out bowls.

We have enclosed the required \$250 fee. Please let us know what we can do to assist you in this effort or if we need to do anything else.

Thanks again for your help and professionalism
