RE: Licensing Amendment 11-7151

I received a call from Michael Danes and Clark Danes on behalf of their father regarding a licensing amendment they had received for 11-7151. In the licensing amendment 206.9 acres were found to be developed during the authorized development period despite that 330 acres had been permitted.

Michael and Clarks concern was the 14 day time limit given to them to respond back to us regarding the amendment. They said it would take more time to gather information to support irrigation of more than the 206.9 acres found during the licensing review.

I told them that they could ignore the time limit for now and get that information to us as soon as possible. I would put a memo in the file stating that we had such a conversation.
