

MEMORANDUM

TO: Transfer No. 76111

FROM: Sharla

DATE: March 5, 2010

RE: Evaluation of Sufficiency of Information Submitted

The transfer proposes to correct the legal description of one existing well, add a third well to the stockwatering system and accurately identify the large stockwater operation's place of use.

The site is located less than 2 miles east of US Hwy 95, situated between US Hwy 20 and the Boise River.

Contact person for the applicant is Lori Graves of SPF Water Engineering.

Summary of Information Submitted

Authority to File: Applicant is owner of record.

Water Right Validity: Right presumed to be valid. SRBA is not applicable to this right developed after 1987. The applicant submitted a copy of the Application for Registration of Existing CAFO with Canyon County which included diagrams of the existing facility. This information is found in the accompanying application for permit 63-33295 file.

Injury to Other Water Rights: None anticipated.

Enlargement of Use: No enlargement is proposed.

Local Public Interest: Feedlot operations provide beef for human consumption. One can assume, therefore, that these operations fill a physical need for food and are in the local public interest.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

Review of the application finds there is no clear inconsistency with criteria of I. C. § 42-222 preventing processing of the application.

Summary

Data entry affected the correct record. Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.

Condition 046 n/a since a new well is not proposed.
