Thanks Michael. I'll ask Danni to place a copy of this email in the file. Since 74-7391 is a permit, the actual POD and POU will be documented as part of the field exam and an amendment of permit will be required at that time to correct those elements. Once the permit is amended, a license will be issued to show the correct locations.

Jeff

Jeff,

I ran across this WR Permit while updating wells without shapes. Yours was the name associated with the Permit processing in 2005. The permit legal for both the POD and POU is 21N22E9NESW, and shapes are in that legal. It is for the LDS church in Salmon. The actual legal, based on taxlots and the church visible in 2004/2009 imagery is NWSE. In addition, DEQ GPSed their well at the SW corner of the building. I've associated the well shape with this location. The Permit POD should also go there, as well as the POU as the parcel, which should have both the NWSE & SWSE as the POU legal.

Feel free to send to Eastern if you know who's working this one.

Michael
